CEOAS Undergraduate Research Funds

The College of Earth, Ocean, and Atmospheric Sciences (CEOAS) is pleased to announce the availability of research funds to undergraduate majors in the college. We anticipate this will be an annual opportunity that will continue in future years.

These funds can be used to pay for supplies, expenses, and travel costs related to the student’s undergraduate research project. Examples include travel to field sites, laboratory supplies, analysis fees, etc. Most funded proposals will be for $500 or less.

To apply, students must:

1. Be majoring in CEOAS (Environmental Sciences, Earth Sciences – all options, Geography and Geospatial Science)
2. Identify a faculty mentor willing to supervise their research
   (Students should contact faculty conducting research in their area of interest to learn more about current research opportunities)
3. Write a research proposal in collaboration with their faculty mentor

Students who are funded will be expected to give a presentation of their research at an appropriate College or University event, such as G&G Day, Geography Day, Celebrating Undergraduate Excellence (CUE), etc.

The deadline to apply is March 15, 2019 5pm
